

EDUCATION

Worcester Polytechnic Institute

Master of Science in Robotics Engineering (In progress)

- GPA: 3.80/4.00

Sardar Patel College of Engineering (University of Mumbai)

Bachelor of Technology in Mechanical Engineering

Capstone Project: *Design and Development of an Autonomous Cooking System*

- CPI: 8.95/10.00 (Class Representative)

Worcester, Massachusetts

2022-2024

Mumbai, India

2018-2022

TECHNICAL SKILLS

- Programming Languages:** Python, C/C++, Java, Arduino
- Software:** ROS/ROS2, Gazebo, WeBots, ADAMS, SolidWorks, AUTOCAD, CURA (3D Printing)
- PLC Programming** (Representation in STL, LAD and FBD), **Fast Prototyping, 3D Printing, Control Circuit Design**

WORK EXPERIENCE

Void Robotics

September-December 2023

Robotics Software Intern

3 Months

- Enhanced autonomous delivery robot navigation accuracy by integrating NMEA and F9P GPS systems.
- Leveraged Micro ROS for real-time communication, improving control and system reliability.
- Collaborated effectively in a cross-functional team, contributing to the overall performance of the project.

The Innovation Story, Mumbai

October-December 2021

Robotics Teaching Intern

2.5 Months

- Devised a robotics syllabus for 8th-10th graders in local schools including requisite physics and math along with robotics-specific knowledge.
- Designed and fabricated a modular mobile pick and place robot for teaching purposes.

Bridgestone India Pvt Ltd

June-July 2021

Mechanical Execution System (MES) Intern

1.5 Months

- Hands-on training experience in MES with emphasis on principles of IOT and Industry 4.0
- Prepared an internship report to be utilized for training future interns.

PROJECTS

Design and development of an autonomous cooking system (Undergraduate Capstone Project)

January-June 2022

- Collaborated in a team of 3 to build a 5 DOF Robot arm from scratch including CAD Modelling, Electronic circuits, and Control algorithms along with subsidiary systems to enable cooking actions.
- Applied different software at various levels of development including SolidWorks, Ansys and WeBots (to simulate the system along with the control algorithm).

Impact Launching (Kicking) Mechanism for a Mobile Robot

September 2019- June 2020

- Designed, engineered, simulated, and methodically validated a precision-oriented mechanism for propelling an object (football) over a 15-meter distance
- Employed a variety of software applications, including SolidWorks, Ansys, Adams, and Webots, at various stages of the development process
- Personally introduced design adjustments, supported by meticulous hand calculations, which played a pivotal role in achieving the designated 15-meter range

Soft Gripper Fabrication and Testing on a Soft Robot @ WPI Manipulation and Environmental Robotics (MER) Lab

June-August 2023

- Fabricated a soft finger gripper for a soft robot
- Devised a mounting and actuation system for the same with emphasis on modularity and weight using a press fit design via Solidworks
- Fabricated the mount and subsidiary parts using 3D printing and tested the same.
- Added components to the design to improve grip stability without significant increase in weight

SCARA Robot Control using ROS2 and Gazebo.

November-December 2022

- Collaborated in a team of 3 to implement a velocity-based and a position-based controller for a 3DOF SCARA Robot built from scratch.
- Used PID control to minimize error in the desired position/velocity.
- Used a ROS service to accept position/velocity values from terminal and apply it to the robot, using analytical inverse kinematics for the former and Jacobian for the latter, both evaluated from scratch.

Pick and place on a UR5e robot using ROS.

October-December 2022

- Collaborated in a team of 5 to implement pick and place operations on a real UR5e robot.
- Used the ur_robot_driver ROS library to interface with the robot through a static network address.
- Derived the forward kinematic equations from scratch using PoE notation and used Newton-Raphson method to numerically solve inverse kinematics.

RRT Based Motion Planner for pick and place on a UR5e robot

March-April 2023

- Implemented a MATLAB simulation of RRT based motion planning on UR5e in the presence of obstacles
- Used the robotics toolbox for importing an accurate robot model
- Sampled points in Cartesian space and used inverse kinematics for pose estimation to perform collision detection

ACHIEVEMENTS

- Publications:**
 - Mepani, M. M., Gala, K. B., Mishra, T. A., Bhole, K. S., Gholave, J., & Daingade, S. (2022). Design of robot arm for domestic culinary assistance. *Materials Today: Proceedings*, 68, 1930-1945.
 - Bhoir, A. A., Mishra, T. A., Narayan, J., & Dwivedy, S. K. (2023). Machine Learning Algorithms in Human Gait Analysis. In *Encyclopedia of Data Science and Machine Learning* (pp. 922-937). IGI Global.
- DD-Robocon:** Collaborated in a team of 20 students to earn National Rank 1 in Round 1 in 2019 and 2021. Rank 9 attained in the Final Round in 2019 and 2020, special prize for Best Solution Idea, 2019.
- National Engineering Olympiad:** National Rank 8 in 2019.
- NPTEL course 'Speaking Effectively':** Top 1% Nationally
- AMCAT:** 99th Percentile in Quantitative Ability (Advanced), 97th Percentile in Logical Ability
- FTC (FIRST Tech Challenge):** Achieved Rank 3 in the National robotics competition and participated in the Asia-Pacific Invitationals in 2015 held at Sydney, Australia.
